

## Science Curriculum Map

	Autumn		Spring		Summer	
Year 1	<u>Seasonal Changes</u> (6 Lessons to be taught across the year)	<u>Human body and senses</u> (5 Lessons)	<u>Naming and Describing Materials</u> (5 Lessons)	<u>Properties and uses of Materials</u> (4 Lessons)	<u>Animals (Vertebrates)</u> (5 Lessons)	<u>Identifying plants and their parts</u> (5 Lessons)
Year 1	<u>Seasonal Changes</u> (6 Lessons to be taught across the year)					
Year 2	<u>Local Habitats</u> (6 Lessons)	<u>Choosing Materials</u> (4 lessons)	<u>Growing Up (animals and humans)</u> (6 lessons)	<u>Growing Seeds and Bulbs</u> (5 lessons)	<u>Changing Materials</u> (4 lessons)	<u>Growing Healthy Plants</u> (5 lessons)
Year 3	<u>Rocks, soils and fossils</u> (6 lessons)	<u>Light and Shadows</u> (5 lessons)	<u>Forces, friction and magnets</u> (6 lessons)	<u>Movement and nutrition for the human body</u> (6 lessons)	<u>Flowering plants and plant growth</u> (5 lessons)	<u>Flowering plants life cycle</u> (5 lessons)
Year 4	<u>Changes of State</u> (8 lessons)	<u>Electricity: circuits</u> (5 lessons)	<u>Human impact on the environment</u> (5 lessons)	<u>Digestion and Food Chains</u> (6 lessons)	<u>Sound</u> (6 lessons)	<u>Classification of plants and animals</u> (5 lessons)
Year 5	<u>Forces and Mechanisms</u> (7 lessons)	<u>Properties and uses of Materials</u> (6 lessons)	<u>Earth and Space</u> (6 lessons)	<u>Plant and Animal Life Cycles</u> (7 lessons)	<u>Separating Mixtures and Changing Materials</u> (lesson 6)	<u>Human Growth</u> (lesson 4)
Year 6	<u>Classification of Living Things</u> (7 lessons)	<u>Evolution and Inheritance</u> (6 lessons)	<u>What light does</u> (6 lessons)	<u>Human Circulation</u> (5 lessons)	<u>Electricity: changing circuits</u> (5 Lessons)	<u>Body Health</u> (4 Lessons)
Physics		Biology		Chemistry		

## National Curriculum Objectives Year 1

Plants	Animals, inc humans	Everyday Materials	Seasonal Changes
<p>1) identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.</p> <p>2) identify and describe the basic structure of a variety of common flowering plants, including trees.</p>	<p>3) identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals</p> <p>4) identify and name a variety of common animals that are carnivores, herbivores and omnivores</p> <p>5) describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)</p> <p>6) identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense</p>	<p>7) distinguish between an object and the material from which it is made</p> <p>8) identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock</p> <p>9) describe the simple physical properties of a variety of everyday materials</p> <p>10) compare and group together a variety of everyday materials on the basis of their simple physical properties</p>	<p>11) observe changes across the four seasons</p> <p>12) observe and describe weather associated with the seasons and how day length varies.</p>

## National Curriculum Objectives Year 2

Plants	Animals, inc humans	Uses of Everyday Materials	Living things and their habitats
<p>1) observe and describe how seeds and bulbs grow into mature plants</p> <p>2) find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.</p>	<p>3) notice that animals, including humans, have offspring which grow into adults</p> <p>4) find out about and describe the basic needs of animals, including humans, for survival (water, food and air)</p> <p>5) describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene</p>	<p>6) identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses</p> <p>7) find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.</p>	<p>8) explore and compare the differences between things that are living, dead, and things that have never been alive</p> <p>9) identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</p> <p>10) identify and name a variety of plants and animals in their habitats, including microhabitats</p> <p>11) describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.</p>

Year 1

Term	Module	NC obj	Lesson Sequence	Substantive Knowledge	Working Scientifically (Disciplinary Knowledge)		
Autumn 1	<b>Seasons</b> (6 Lessons to be taught across the year)	11, 12	1) Are all leaves the same? (September)	<ul style="list-style-type: none"> <li>✓ To know that in the winter the weather becomes colder and the daylight hours shorter</li> <li>✓ To know that deciduous leaves change colour in the autumn and fall to the ground</li> <li>✓ To know evergreen trees do not drop their leaves</li> <li>✓ To know that in spring the daylight hours increase and there are more flowering plants</li> <li>✓ To know different types of birds are seen at different times of the year</li> <li>✓ To know more insects are seen in the spring and summer</li> <li>✓ To know that the sun is highest in the sky in the summer</li> </ul>	<ul style="list-style-type: none"> <li>➤ Asking simple questions and recognising that they can be answered in different ways</li> <li>➤ Observing closely, using simple equipment</li> <li>➤ Identifying and classifying</li> </ul>	<b>Tier 2</b> compare describe different match record (verb) similar weather	<b>Tier 3</b> group identify observe berry bird bud deciduous evergreen flower fruit insect leaf (leaves) nest nut petal plant seasons seed tree
Autumn 2	<b>Human body and senses</b> (5 Lessons)	6	1) Is everybody's body the same? 2) How can we explore the world using our sense of touch? 3) What can we hear? 4) What smells do we like and dislike? 5) What differences can our tongues taste?	<ul style="list-style-type: none"> <li>✓ To identify, name, draw and label the head, arms, hands, torso, legs and feet.</li> <li>✓ To know the five senses of sight, hearing, touch, smell and taste.</li> <li>✓ To know our eyes give us the capacity to see</li> <li>✓ To know our nose gives us the capacity to smell</li> <li>✓ To know that our tongue gives us the capacity to taste</li> <li>✓ To know our ears give us the capacity to hear</li> <li>✓ To know our hands and feet are our most commonly used body parts to explore touch</li> </ul>	<ul style="list-style-type: none"> <li>➤ Observing closely, using simple</li> </ul>	<b>Tier 2</b> texture	<b>Tier 3</b> classify diagram group identify pattern rank brain hearing mammal sense sight smell taste torso touch

				✓ To know that humans are all the same generally but vary in their skin, hair, eye colour, shoe size and fingerprints for example.			
	<b>Seasons</b> (6 Lessons to be taught across the year)	11, 12	2) Which animals share our space? (autumn) 3) Do all trees shed their leaves? (early winter)				
Spring 1	<b>Naming and Describing Materials</b> (5 Lessons)	7, 8	1) What material is this? Part 1 2) What material is this? Part 2 3) Is all paper the same? 4) Is all fabric the same? 5) How can we group objects made of different materials?	<ul style="list-style-type: none"> <li>✓ To know everything around us is made from materials</li> <li>✓ To know some materials are natural</li> <li>✓ To know some materials are manufactured – made by changing natural source materials</li> <li>✓ To know that objects can be made from different materials</li> <li>✓ To identify items made from wood, plastic, metal, glass, water and rock</li> <li>✓ Materials should be used carefully and can often be reused or recycled.</li> <li>✓ Objects can be sorted according to their source material</li> </ul>	<ul style="list-style-type: none"> <li>➤ Observing closely, using simple equipment</li> <li>➤ Performing simple tests</li> <li>➤ Using their observations and ideas to suggest answers to questions</li> </ul>	<b>Tier 2</b> compare describe different record similar sort suitable use	<b>Tier 3</b> <b>previously taught</b> observe natural magnifier property test recycle absorb reuse absorbent transparent manufactured classify material group
Spring 2	<b>Properties and uses of Materials</b> (4 Lessons)	7, 9, 10	1) Can the same object be made from different materials? 2) What properties do materials have? 3) Does it bend or stretch? 4) Do all materials get wet?	<ul style="list-style-type: none"> <li>✓ To know objects can be made from more than one material, including recycled materials.</li> <li>✓ To know materials have physical properties that make them useful for different purposes</li> </ul>	<ul style="list-style-type: none"> <li>➤ Observing closely, using simple equipment</li> <li>➤ Performing simple tests</li> <li>➤ Using their observations and ideas to suggest answers to questions</li> <li>➤ Gathering and recording data to help in answering questions</li> </ul>	<b>Tier 2</b> compare different describe record similar sort suitable use	<b>Tier 3</b> <b>previously taught</b> bar chart group test observe bend absorb/absorbent flexible manufactured opaque material rigid natural waterproof property recycle reuse transparent
	<b>Seasons</b> (6 Lessons to be taught across the year)	11, 12	4) Are all flowers the same? (spring)				

	taught across the year)		5) Which birds visit our bird feeder? (spring)				
Summer 1	<u>Seasons</u> (6 Lessons to be taught across the year)	11, 12	6) How has our space changed over the year? (early summer)				
	<u>Animals (Vertebrates)</u> (5 Lessons)	3, 4, 5	1) Who's who is the animal (vertebrate) world? 2) What's so special about birds? 3) What makes an amphibian an amphibian? 4) Do fish have fingers? 5) Are humans mammals?	To know:- ✓ vertebrates are animals with a backbone ✓ the five vertebrate groups – mammals, amphibians, reptiles, birds, fish ✓ features of reptiles: eggs, claws, teeth, scaly skin, living on land. ✓ features of birds: eggs, feathers, beaks, claws, wings ✓ features of amphibians: eggs, water and land living, changes to them as they grow ✓ features of fish: water living, scales, gills, teeth, fins, eggs ✓ features of mammals: hair or fur, give birth to live young, produce milk, nurture offspring, look like a younger version of parent, range of movement ✓ animals can be grouped by what they eat: carnivores, herbivores, omnivores	➤ Observing closely, using simple equipment ➤ Using their observations and ideas to suggest answers to questions	Tier 2 feature structure	Tier 3 adult amphibian carnivore diet fish herbivore mammal omnivore reptile vertebrate

previously taught  
 classify  
 group (verb)  
 identify  
 bird

Summer 2	<b>Identifying plants and their parts</b> (5 Lessons)	1, 2	1) What wild and garden plants can we find around our school?	To know:- ✓ The names of the parts of a flowering plant that grow above the ground are stem, leaf and flower. ✓ Roots grow under the ground and different plants have different roots. ✓ Some trees are flowering plants which have roots, stems, leaves and flowers. ✓ There are differences between deciduous and evergreen trees. ✓ There are similarities and differences between flowering plants.	➤ Observing closely, using simple equipment ➤ Identifying and Classifying	Tier 2 different compare describe similar texture	Tier 3 bark roots stem trunk	previously taught classify group (verb) identify observe deciduous evergreen flower leaf plant (noun)
			2) What parts of a plant grow above the ground?					
			3) What parts of a plant grow under the ground?					
			4) Why are trees plants?					
			5) What are the similarities and differences between plants that have flowers?					

Year 2								
Term	Module	NC obj	Lesson Sequence	Substantive Knowledge	Working Scientifically (Disciplinary Knowledge)			
Autumn 1	<b>Local Habitats</b> (6 Lessons)	8, 9, 10, 11	1) Are the things I find alive, have never been alive or once were alive?	To know:- ✓ and identify things that are living, dead and have never been alive (rock, metal, plastic) ✓ that living things live in a habitat suited to the needs ✓ a habitat provides shelter, food and water ✓ different animals live in different parts of a woody habitat ✓ different animals live in different parts of a grassy habitat ✓ animals in these different habitats eat plants and other animals and these are known as food chains	➤ Observing closely, using simple equipment ➤ Identifying and classifying ➤ Using their observations and ideas to suggest answers to questions	Tier 2 compare feed move record	Tier 3 previously taught order alive breathe consumer dead decay decomposer depend food chain habitat	never been alive once alive producer shelter survive identify observe pattern insect omnivore
			2) What lives in my tree?					
			3) What animals live in this woody habitat?					
			4) What animals live in this grassy habitat?					
			5) What do animals that live in the wood eat?					
			6) What do animals that live in the pond eat?					

Autumn 2	<b>Choosing Materials</b> (4 lessons)	6	1) Is that a good choice of material? 2) Which ball bounces highest? 3) Which materials are good for a toddler's play dungarees? 4) Who develops new materials?	To know:- ✓ materials have properties ✓ some materials are more suitable for a particular use ✓ some properties of fabrics ✓ inventors create new materials and discover new uses for existing materials	➤ Asking simple questions and recognising that they can be answered in different ways ➤ Performing simple tests ➤ Identifying and classifying ➤ Using their observations and ideas to suggest answers to questions ➤ Gathering and recording data to help in answering questions	Tier 2 compare design discover fit for purpose invent record suitable use	Tier 3 previously taught comparative test enquiry fair measure bouncy bounce durable elastic elasticity bar chart observe observation rank test absorb absorbent flexible material opaque property rigid transparent waterproof
Spring 1	<b>Growing Up (animals and humans)</b> (6 lessons)	3,4,5	1) How do animals change as they grow? 2) What do animals need to survive? 3) How can we sort food into groups? 4) How can humans stay clean? 5) How can humans stay active? 1) How do humans stay healthy?	To know:- ✓ Animals grow and change ✓ Animal need food, water and air to survive ✓ Humans need to eat food from the four main food groups each day:- fruit and veg; dairy; meat, fish, pulses and eggs; starchy foods inc bread, potatoes, pasta, rice ✓ Humans need to stay clean and hygienic to be healthy ✓ Regular physical activity is important for good health	➤ Identifying and classifying ➤ Using their observations and ideas to suggest answers to questions	Tier record	Tier 3 previously taught birth healthy hygiene hygienic invertebrate life cycle classify diagram group identify observe adult amphibian bird diet fish insect mammal reptile survive vertebrate

Spring 2	<b>Growing Seeds and Bulbs</b> (5 lessons)	1	2) How do plants grow and change over time? 3) How are seeds and bulbs different? 4) What do seeds need to germinate? 5) How tall will they grow? 6) What have we learnt about how a seed germinates?	To know:- ✓ Germination is when a seed starts to sprout and grow. ✓ Seeds need certain conditions to germinate. ✓ All require water, some require warmth, and most do not need light. ✓ Seeds come in a variety of sizes. ✓ The size of the seed does not determine how tall the mature plant that grows from it will be. Mature plants can grow from either seeds or bulbs.	➤ Observing closely, using simple equipment ➤ Performing simple tests ➤ Identifying and classifying ➤ Gathering and recording data to help in answering questions	Tier compare describe record	Tier 3 previously taught accurate comparative test effect enquiry explain/ explanation fair observing over time bulb conditions germinate germination mature seedling bar chart observe group identify pattern rank test flower leaf roots seed stem
Summer 1	<b>Changing Materials</b> (4 lessons)	7	1) How can I change the shape of an object? 2) What properties allow a material to be changed? 3) Which material is fit for purpose? 4) What can pushes and pulls do?	To know:- ✓ Squashing, bending, stretching and twisting can change the shape of some materials. ✓ Different properties allow the shapes of materials to be changed in different ways. ✓ Objects are made from materials with properties that make them fit for purpose	➤ Asking simple questions and recognising that they can be answered in different ways ➤ Performing simple tests ➤ Identifying and classifying ➤ Using their observations and ideas to suggest answers to questions ➤ Gathering and recording data to help in answering questions	Tier action discover discovery fit for purpose invent inventor pull push suitable use	Tier 3 previously taught elastic elasticity squashy squash stiff stretchy stretch twist test bend flexible material property rigid

Summer 2	<b>Growing Healthy Plants</b> (5 lessons)	2	1) How can we care for our plants? 2) Do mature plants need light? 3) Does temperature affect the growth of mature plants? 4) Do mature plants need water? 5) What have we learnt about what mature plants need to grow healthy?	To know:- ✓ Seeds germinate into seedlings and then grow into mature plants. ✓ Mature plants need light and water to grow healthily. ✓ Different mature plants require different temperatures to grow healthily depending on the type of plant	➤ Performing simple tests ➤ Using their observations and ideas to suggest answers to questions ➤ Gathering and recording data to help in answering questions	Tier compare describe record	Tier 3 <b>previously taught</b> comparative bulb test conditions enquiry germinate explain germination explanation healthy measure light measurement mature pattern seedling seeking soil predict leaf prediction roots results seed temperature stem thermometer

### National Curriculum Objectives Year 3

Plants	Animals, inc humans	Rocks	Light	Forces and Magnets
1) identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers 2) explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant 3) investigate the way in which water is transported within plants 4) explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.	5) identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat 6) identify that humans and some other animals have skeletons and muscles for support, protection and movement.	7) compare and group together different kinds of rocks on the basis of their appearance and simple physical 8) properties describe in simple terms how fossils are formed when things that have lived are trapped within rock 9) recognise that soils are made from rocks and organic matter.	10) recognise that they need light in order to see things and that dark is the absence of light 11) notice that light is reflected from surfaces 12) recognise that light from the sun can be dangerous and that there are ways to protect their eyes 13) recognise that shadows are formed when the light from a light source is blocked by an opaque object 14) find patterns in the way that the size of shadows change.	15) compare how things move on different surfaces 16) notice that some forces need contact between two objects, but magnetic forces can act at a distance 17) observe how magnets attract or repel each other and attract some materials and not others 18) compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials 19) describe magnets as having two poles 20) predict whether two magnets will attract or repel each other, depending on which poles are facing.

### National Curriculum Objectives Year 4

Living Things and their Habitats	Animals, inc humans	States of Matter	Sound	Electricity
1) recognise that living things can be grouped in a variety of ways explore and use	3) describe the simple functions of the basic parts of the digestive system in humans	6) compare and group materials together, according to whether	8) identify how sounds are made, associating some of them with something vibrating	12) identify common appliances that run on electricity

<p>classification keys to help group, identify and name a variety of living things in their local and wider environment</p> <p>2) recognise that environments can change and that this can sometimes pose dangers to living things.</p>	<p>4) identify the different types of teeth in humans and their simple functions</p> <p>5) construct and interpret a variety of food chains, identifying producers, predators and prey.</p>	<p>they are solids, liquids or gases observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)</p> <p>7) identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.</p>	<p>9) recognise that vibrations from sounds travel through a medium to the ear</p> <p>10) find patterns between the pitch of a sound and features of the object that produced it</p> <p>11) find patterns between the volume of a sound and the strength of the vibrations that produced it recognise that sounds get fainter as the distance from the sound source increases.</p>	<p>13) construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers</p> <p>14) identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery</p> <p>15) recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit</p> <p>16) recognise some common conductors and insulators, and associate metals with being good conductors.</p>
---	---	---	--	---

Year 3							
Term	Module	NC obj	Lesson Sequence	Substantive Knowledge	Working Scientifically (Disciplinary Knowledge)		
Autumn 1	<b>Rocks, soils and fossils</b> (6 lessons)	7 8 9	<p>1) How are rocks different and what rock is this?</p> <p>2) What are rocks used for?</p> <p>3) How are soils different?</p> <p>4) Which soils hold water?</p> <p>5) What is this fossil?</p> <p>6) Who was Mary Anning and how did she become a palaeontologist?</p>	<ul style="list-style-type: none"> <li>✓ Rocks can be compared according to their appearance and properties</li> <li>✓ Properties of rocks make them useful for different purposes</li> <li>✓ Some rocks contain fossils</li> <li>✓ Fossils are formed when living things are trapped within a rock</li> <li>✓ Mary Anning is a fossil Scientist</li> </ul>	<ul style="list-style-type: none"> <li>➤ setting up simple practical enquiries, comparative [and fair] tests</li> <li>➤ making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers</li> <li>➤ recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts and tables</li> <li>➤ identifying differences, similarities [or changes] related to simple scientific ideas and processes</li> <li>➤ recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts and tables</li> </ul>	<p><b>Tier 2</b></p> <p>appearance compare drain flood layer similar structure texture</p>	<p><b>Tier 3</b> <b>previously taught</b></p> <p>evidence identifying and classifying microscope crystal crystalline erosion fossil hardness organic Palaeontologist remains rock sediment weathering</p> <p>comparative test enquiry identify observe observation test absorb absorbent durable material property</p>

Autumn 2	<p style="text-align: center;"><b>Light and Shadows</b> (5 lessons)</p>	10, 11, 12, 13, 14	<ol style="list-style-type: none"> <li>1) What do we need to see?</li> <li>2) Which object is the most reflective?</li> <li>3) How are shadows made?</li> <li>4) Is my shadow like me?</li> <li>5) How can we change the size of a shadow?</li> </ol>	<ul style="list-style-type: none"> <li>✓ Light comes from light sources</li> <li>✓ Dark is the absence of light</li> <li>✓ Shiny objects have surfaces that are good at reflecting light</li> <li>✓ When there is less light, more reflective materials are easier to see than less reflective ones.</li> <li>✓ Shadows form when light is blocked.</li> <li>✓ Opaque materials block all light</li> <li>✓ To know how shadows can be changed</li> </ul>	<ul style="list-style-type: none"> <li>➤ making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers</li> <li>➤ using results to draw simple conclusions, making predictions for new values, suggest improvements [and raise further questions]</li> <li>➤ identifying differences, similarities [or changes] related to simple scientific ideas and processes</li> <li>➤ using straightforward scientific evidence to answer questions or support their findings</li> </ul>	<p><b>Tier 2</b></p> <p>absence absent artificial block similar surface</p>	<p><b>Tier 3</b> <b>previously taught</b></p> <p>Conclude light Conclusion light source lux Comparative opaque test reflect data reflection data logger sensor explain shadow explanation sun identifying sunlight and translucent classifying transparent measure ultraviolet measurement enquiry pattern measure predict measurement prediction observe bright observation dark pattern darkness predict data logger prediction dim</p>

Spring 2

Digestion and Food Chains  
(6 lessons)

3  
4  
5

- 1) Where does all the food we eat go?
- 2) What teeth do humans have?
- 3) What do teeth do in the digestive system?
- 4) What happens to food after we put it in our mouths?
- 5) What do animals eat?
- 6) What do animals teeth tell us?

To know:-

- ✓ The digestive system breaks down food into smaller pieces that our body can use for energy and growth and gets rid of waste.
- ✓ The main parts of the digestive system are the mouth, oesophagus, stomach, small intestine, large intestine, rectum and anus.
- ✓ Humans have different types of teeth: incisors, canines and molars.
- ✓ Teeth have different shapes to break up different foods. Incisors are used for cutting food, canines for tearing and molars for grinding.
- ✓ Food is chemically broken down in the stomach and small intestine, the large intestine absorbs water and the rectum stores poo.
- ✓ A food chain shows how energy and nutrients pass from one living thing to another as they eat or get eaten by each other.
- ✓ A producer (a plant) makes the food using water, air and the energy of the sun.
- ✓ This is passed to the consumer (a herbivore) that eats it.
- ✓ It is then passed to any animal (a carnivore) that eats the consumer.
- ✓ Animals have teeth appropriate to the food they eat.
- ✓ Carnivores have sharp slicing teeth for eating meat.

- Making systematic and careful observations [and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers].
- Recording findings using simple scientific language, [drawings,] labelled diagrams, keys, [bar charts, and tables].
- Reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.
- Identifying differences, similarities [or changes] related to simple scientific ideas and processes.
- Using straightforward scientific evidence to answer questions or to support their findings.

## National Curriculum Objectives Year 5

Living things and their habitats	Animals, inc humans	Properties and Changes of Materials	Earth and Space	Forces
<p>1) describe the changes as humans develop to old age.</p>	<p>2) compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets</p> <p>3) know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution</p> <p>4) use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</p> <p>5) give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic</p> <p>6) demonstrate that dissolving, mixing and changes of state are reversible changes</p> <p>7) explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.</p>	<p>8) compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets</p> <p>9) know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution</p> <p>10) use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</p> <p>11) give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic</p> <p>12) demonstrate that dissolving, mixing and changes of state are reversible changes</p> <p>13) explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.</p>	<p>14) describe the movement of the Earth, and other planets, relative to the Sun in the solar system</p> <p>15) describe the movement of the Moon relative to the Earth</p> <p>16) describe the Sun, Earth and Moon as approximately spherical bodies</p> <p>17) use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.</p>	<p>18) explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object</p> <p>19) identify the effects of air resistance, water resistance and friction, that act between moving surfaces</p> <p>20) recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.</p>

## National Curriculum Objectives Year 6

Living Things and their Habitats	Light	Evolution and Inheritance	Animals, inc humans	Electricity
<p>17) describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals</p>	<p>19) recognise that light appears to travel in straight lines</p> <p>20) use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye</p> <p>21) explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes</p>	<p>23) recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago</p> <p>24) recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents</p>	<p>26) identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood</p> <p>27) recognise the impact of diet, exercise, drugs</p>	<p>29) associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit</p> <p>30) compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers</p>

<p>18) give reasons for classifying plants and animals based on specific characteristics.</p>	<p>22) use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them</p>	<p>25) identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.</p>	<p>and lifestyle on the way their bodies function 28) describe the ways in which nutrients and water are transported within animals, including humans.</p>	<p>and the on/off position of switches 31) use recognised symbols when representing a simple circuit in a diagram.</p>
---	---	---	--	--

Term	Module	NC obj	Lesson Sequence	Substantive Knowledge	Working Scientifically (Disciplinary Knowledge)		
Autumn 1	<u>Forces and Mechanisms</u> (7 Lessons)	18 19 20	1) What is the friction between different surfaces? 2) Why do objects fall at different speeds? 3) How does the size of the canopy affect the time it takes a parachute to fall? 4) Does the shape of an object affect its movement in liquid? 5) How can we lift a heavy load? 6) How does the length of the lever affect the force needed to lift a load? 7) How do gears work?	<ul style="list-style-type: none"> <li>✓ Friction is a force that makes it harder to move an object across a surface or slows down an object moving over a surface.</li> <li>✓ The unit of measurement of a force is Newtons (abbreviated to N).</li> <li>✓ Gravity is a force that pulls all objects to the centre of the Earth.</li> <li>✓ Air resistance is a force that slows down an object moving through air.</li> <li>✓ The amount of air resistance depends on the surface area of the object.</li> <li>✓ It is air resistance, not the object's weight, that affects how quickly an object falls.</li> <li>✓ Water resistance is a force that slows down an object moving through water.</li> <li>✓ The amount of water resistance depends on the shape of the object.</li> <li>✓ A pulley is a mechanism used for lifting heavy objects (the load) by applying a pulling force at one end of rope attached to the load which passes over a wheel.</li> <li>✓ A lever is a long rigid arm that rests on a pivot. A force is applied to one part of the lever to lift the load at another point on the lever.</li> <li>✓ A gear is a mechanism which consists of wheels with teeth that slot together. Gears change the direction of movement and the force required to make something move.</li> </ul>	<ul style="list-style-type: none"> <li>➤ Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.</li> <li>➤ Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.</li> <li>➤ Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.</li> <li>➤ Using test results to make predictions to set up further comparative and fair tests.</li> <li>➤ Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations.</li> <li>➤ Identifying scientific evidence that has been used to support or refute ideas or arguments.</li> </ul>	Tier 2 anticlockwise clockwise system	Tier 3 <b>previously taught</b> accuracy dependent variable independent variable line graph air resistance force meter fiction fulcrum gears gravity impact level load magnetism Newton Oppose Pivot Pulley Water resistance accurate comparative test conclude conclusion control variable enquiry evaluate fair test precise predict prediction refute support variable contact force force non-contact force

Autumn 2	<u>Properties and uses of materials (6 Lessons)</u>	8 9 10 11 12 13	<p>1) How can we compare and group materials?</p> <p>2) Which materials did the builders use when constructing our school and why?</p> <p>3) Which liquid is the thickest?</p> <p>4) Who invents things?</p> <p>5) Can the same container keep cold things cold and hot things hot?</p> <p>6) Which materials are absorbent, permeable or waterproof?</p>	<ul style="list-style-type: none"> <li>✓ To know some properties of everyday materials such as hardness, solubility, transparency, conductivity, electrical and thermal and response to magnets</li> <li>✓ To know why metals, wood and plastics have particular uses</li> <li>✓ Weathering, wear and tear can occur over time and this will have an impact upon a material's fitness for purpose.</li> <li>✓ The properties of liquids include having a fixed weight, a fixed volume, an ability to flow, a level of viscosity; and they take on the shape of a container.</li> <li>✓ The viscosity of a liquid describes how thick or thin it is and how fast or slowly it will flow.</li> <li>✓ A thermal insulator is a material that does not transmit heat through it well.</li> <li>✓ A thermal conductor is a material that transmits heat through it very well.</li> <li>✓ A thermal insulator keeps hot things hot and cold things cold.</li> <li>✓ Materials can be absorbent and can soak up and take in liquid.</li> <li>✓ Some materials are permeable and let water pass through.</li> <li>✓ Some materials are waterproof and do not let water pass through.</li> </ul>	<ul style="list-style-type: none"> <li>➤ Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.</li> <li>➤ Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.</li> <li>➤ Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.</li> <li>➤ Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and a degree of trust in results, in oral and written forms such as displays and other presentations.</li> <li>➤ Identifying scientific evidence that has been used to support or refute ideas or arguments.</li> </ul>	<p><b>Tier 2</b></p> <p>construction design disassemble dispose flow invent invention leak pour structure</p>	<p><b>Tier 3 previously taught</b></p> <p>criterion dependent variable independent variable survey brittle ductile fragile impermeable malleable malleability permeable thermal conductor thermal insulator viscosity viscous wear and tear comparative test control variable data evaluate</p> <p>observe observation predict predicting scale variable absorb absorbent compost decompose durable elastic elasticity electrical conductor insulator flexible flexibility hard hardness</p>
